

2010 Clinically Preferred Drug List

3rd Quarter Edition

Table of Contents

OVERVIEW	4	BLOOD MODIFIERS	13
COVERAGE LIMITATION	4	Anticoagulants / Heparin Related Products	13
DESI DRUGS	4	Platelet Aggregation Inhibitors	13
SELECTION PROCESS FOR PRODUCTS	5	Hematopoietic Agents, Iron Replacement	13
PREFERRED BRAND PRODUCTS	5	CARDIOVASCULAR (HEART) AGENTS	14
GENERIC SUBSTITUTION	6	Alpha & Beta Blockers	14
NON-LISTED DRUGS & DRUG CATEGORIES	6	Beta Blockers with Diuretics	14
PRIOR AUTHORIZATION PROCESS	6	Calcium Channel Blockers (CCBs)	14
SPECIALTY PHARMACY PRODUCTS	6	ACE Inhibitors & ACE Inhibitors / CCB Combinations	15
FORMULARY MODIFICATIONS & COMMENTS	7	A-2 Antagonists (ARBs) / A-2 Antagonists w/ Diuretics	15
ANTIBIOTICS	8	Antiarrhythmics/Anti-Ischemic	16
Penicillins & Cephalosporins	8	Cardiac Glycosides	16
Tetracyclines	8	Sympatholytic Agents	16
Macrolides & Clindamycins	8	Vasodilators; Coronary, Miscellaneous	16
Sulfonamides, Sulfones & Ketolides	8	ANTIHYPERTENSIVE (CHOLESTEROL) AGENTS	17
Miscellaneous Antibiotics	8	Statins & Statin/CCB Combinations	17
Quinolones	9	Bile Acid Sequestrants, Liver Agents	17
Antivirals	9	Fibrates	17
ANTI-INFECTIVES	9	Other Agents	17
HIV Antiviral Agents	9	PANCREATIC AGENTS	17
Amebicides, Trichomonocides	10	KIDNEY & URINARY / UROLOGICAL AGENTS	18
Antiparasitics	10	Diuretics	18
Antimalarials & Antiprotozoals	10	Benign Prostate Hyperplasia	18
Anthelmintic Agents	10	Urologic Agents	18
Leprostatic Agents	10	Erectile Dysfunction Agents	18
Antifungals	10	Gout Agents – Purine Inhibitors	19
ANTIEMETIC (NAUSEA) AGENTS	11	Urinary Ph Modifiers	19
NEUROLOGIC AGENTS	11	Electrolyte Depleters	19
Anti-Parkinsons Agents	11	Potassium & Electrolytes	19
Anti Migraine Agents	11	MUSCLE RELAXANTS	19
Alzheimers Agents	12	OSTEOPOROSIS (BONE) AGENTS	20
Anti-Convulsants	12	ANTI-INFLAMMATORY / ANALGESIC (PAIN) AGENTS	20
Fibromyalgia Agents	12	Anti-Inflammatory Agents (NSAIDS)	20
		COX-II Agents	21
		Analgesics, Narcotics	21
		Analgesics, Salicylates & Non-Salicylates	21
		Pain Medications, Other	21

CENTRAL NERVOUS SYSTEM AGENTS	22	DERMATOLOGICAL (SKIN) AGENTS	33
Anti-Anxiety Agents	22	Acne, Rosecea & Seborrhea Products (Oral & Topical)	33
Sedative/Hypnotic Agents (Non-Barbituate)	22	Psoriasis Agents (Oral & Topical)	33
Sedative/Hypnotic Agents (Barbituate/CNS)	22	Antifungals & Antipruritics (Oral & Topical)	33
ADD/ADHD / Narcolepsy / Adrenergics	22	Keratolytics / Wound Care Agents	34
Serotonin Selective Reuptake Inhibitors (SSRIs)	23	Emollients	34
Serotonin Non-Selective Reuptake Inhibitors (SNRIs)	23	Scabies & Pediculosis Agents	34
SSRI / Anti-Psychotic Combinations	23	Topical Immunosuppressive Agents (Non-steroidal)	34
Monoamine Oxidase Inhibitors (MAOIs)	23	Topical Anti-Infectives & Steroids	35
Antidepressants, Others	23	Topical Local Anesthetics & Analgesics	35
Antipsychotic Agents	24	Other Topical Products	35
Atypical Antipsychotic Agents	24		
Bipolar Disorders (Anti-mania)	24	VAGINAL AGENTS	36
GASTROINTESTINAL AGENTS	25	Vaginal Antibiotics / Sulfonamides	36
Anti-Ulcer / GERD (PPIs), H. Pylori Agents	25	Vaginal Antifungals	36
Anti-Spasmodic Agents (Anticholinergics)	25		
Bowel & Colon Inflammatories	25	OPHTHALMIC (EYE) AGENTS	36
Irritable Bowel Syndrome (IBS) Agents	25	Ophthalmic Antibiotics & Sulfonamides	36
Laxatives & Cathartics	25	Ophthalmic Antivirals	36
		Ophthalmic Antihistamines	37
CONTRACEPTIVES & HORMONE THERAPY AGENTS	26	Ophthalmic Immunomodulators	37
Contraceptives	26	Ophthalmic Anti-Inflammatory Agents	37
Estrogens (Hormone Replacement)	26	Ophthalmic Mast Cell Stabilizers	37
Estrogen Combinations	27	Ophthalmic Vasoconstrictors	37
Androgenic Agents	27	Ophthalmic Miotics	38
Progestinal Agents	27	Ophthalmic Mydriatics	38
Fertility Agents (Orals)	27	Ophthalmic Antibiotic/Corticoid Combination Agents	38
PRE-NATAL VITAMINS	28	OTIC (EAR) AGENTS	39
THYROID MEDICATIONS	28	MISCELLANEOUS PRODUCTS	39
Corticosteroids / Mineralocorticoids (Systemic)	28	Alcohol Dependency Agents	39
Anti-Thyroid & Thyroid Replacements	28	Dental Preparations	39
		Hyperparathyroid Agents	39
DIABETES AGENTS	29	Metallic Poison Treatment Agents	40
Insulins – Synthetic, Human, Injectibles	29	Parasympathetic Agents	40
Oral Anti-Diabetics / Thiazolidinediones / Combinations	29	Smoking Cessation Products	40
Anti-Diabetes Injectibles	29	Influenza Virus Agents/Products	40
DIABETIC PRODUCTS	30	IMMUNOSUPPRESSANT AGENTS	41
Diabetic Supplies	30	Immunosuppressants	41
Urine Glucose / Ketone Strips	30	Immunomodulators	41
Hyperglycemic Agents	30		
Medical Supplies	30	ANTINEOPLASTIC AGENTS	42
		SPECIALTY PRODUCTS & SUPPLIES	44
RESPIRATORY AGENTS	31	Hepatitis Treatment Agents	44
Allergy Medications	31	Antipsoriatic Agents	44
Asthma Agents	31	Human Growth Hormones (HGH)	44
Glucocorticoid Steroids / Inhalers & Intranasal	32	Multiple Sclerosis (MS) Agents	45
COPD Agents	32	Rheumatoid Arthritis Agents	45
Theophyllin Agents	32	Lung Affecting Agents	45
Antitussive Agents	32	Fertility Agents (Orals)	45
Respiratory Agents & Devices	32	Miscellaneous Agents	46

Preface

Overview

The **Clinically Drug Preferred List** is a continually updated list of prescription medications that represents the current clinical judgement of providers and experts in the diagnosis and treatment of disease. This Clinically Preferred Drug List contains additional prescribing and clinical information that assists health care professionals in promoting the highest quality affordable care to patients. This document represents the efforts of our clinical team to provide physicians, pharmacists and/or members with a method to evaluate the various drug products available. The Clinically Preferred Drug List shows both the generic and brand names for reference and convenience. Some plan sponsors, HMOs or Health Plans, or Employers may be provided the option of imposing further restrictions or choose not to reimburse some products listed in the **Clinically Preferred Drug List**.

Additionally, as drug prices increase and utilization grows, tightening the formulary to limit selection to preferred products has become more critical. Our clinicians work together to create a balanced formulary offering the very best clinical products that (1) are effective, (2) are efficacious, (3) are safe, (4) have the fewest side effects, and (5) are provided at the best price. The Formulary Changes & Comments section located on page 7 provides a quick glance of the changes that are being made in the **Clinically Preferred Drug List** to maintain a fine balance.

Coverage Limitation

The **Clinically Preferred Drug List** does not provide information regarding specific coverage and limitations, nor specific exclusions, copays, or a lack of coverage that a member may have assigned at plan level. The **Clinically Preferred Drug List** applies only to outpatient drugs provided to members, and does not apply to medications used in the in-patient setting. All applicable dosage forms and strengths of a particular drug are included in the Clinically Preferred Drug List under the specific entry unless otherwise noted and listed separately.

Desi (drug efficacy study implementation) Drugs

DESI designated drugs are those drugs first marketed between 1938 and 1962 that were approved as safe but were not required to prove effectiveness for FDA product approval. The DESI Program was implemented to determine which of these designated drugs could indeed claim in clinical trials, effectiveness for their specific indications. A few DESI drugs remain classified as less than effective while awaiting final administrative disposition. Many products listed as identical, similar, or related to actual DESI drugs may also be classified as DESI. Some pharmacy benefit reimbursement plans may not pay for DESI drug products.

Selection Process for Products on the Clinically Preferred Drug List

New agents are constantly being developed and approved by the FDA for the treatment of the different disease states. Due to vast availability of medication therapies and treatments, a reasonable process of drug selection and drug usage has been developed. The goal of the Clinically Preferred Drug List is to enhance the physicians' and pharmacists' abilities to provide optimal cost-effective drug therapies to patients.

The development, maintenance, and improvement of the Clinically Preferred Drug List are evolutionary processes that require the constant attention of our P&T Committee. The Clinically Preferred Drug List is a continually reviewed and revised list of drug products that mirrors the prevailing clinical opinion of the P&T Committee. Unfortunately, this dynamic process does not allow this document to be completely accurate in official print at all times although it is always available in PDF format. Due to introduction of new brand and generic products, a book may only be printed once annually with updates being provided as necessary through newsletters and updates made readily available on the Internet for physicians, pharmacists and plan sponsors.

New agents being considered for formulary inclusion will be reviewed for their safety, efficacy, FDA-approved indications, contraindications, side effects, pharmacokinetic profile, patient compliance potential, drug cost and effects on other indirect health costs. A thorough medical literature review will place an emphasis on the following characteristics:

- Safety and Effectiveness of Product
- Comparison Studies with Similar Products if available
- Potential for Patient Clinical or Utilization Abuse
- Therapeutic Outcomes and Pharmaco-economic Data

Agents that are given a "priority" review by the FDA will be immediately reviewed for possible inclusion into the formulary, in as little as 48 hours if necessary. New drugs will have their characteristics compared to other similar agents within a therapeutic class if possible. New drugs that are added to an existing therapeutic class may result in the deletion of other drug(s) within a particular therapeutic class as clinical application warrants. This process ensures and promotes the selection of the most clinically useful and cost-effective agents within a specific therapeutic class.

Preferred Brand Products

Drugs that are added to the Clinically Preferred Drug List indicate that the specific drug offers a clinical and/or cost advantage over existing comparable non-preferred formulary branded drugs. Drugs will not be placed on the Clinically Preferred Drug List if there currently is insufficient clinical information to determine its appropriate clinical effectiveness. Other drugs not included in this book are: any non-preferred or non-formulary products; drugs proven to be clinically ineffective; extremely cost ineffective, or cause adverse health conditions; and high cost drug therapies that require Prior Authorization and utilization management.

Single source generics, generics that are available from only one source, may be considered non-preferred brands with either generic or non-preferred brand copays depending on their price. Such drugs are noted with a [SSG] next to their generic name.

Generic Substitution

When available, FDA approved lower cost generic drugs should be used regardless of the brand name indicated. The brand names listed under the “Generic Drugs” column are for reference use only and do not guarantee coverage. This policy is not meant to preclude any state statutes that may exist (e.g., Non-Substitutable Drugs). Inclusion of a drug product for generic substitution is subject to the following:

- An FDA Rating of "A" for generic equivalency as well as thorough review by the P&T Committee for efficacy and safety
- Certain drug products with complex pharmacokinetics, dosage forms, narrow therapeutic indexes **MAY** not typically subject to substitution. These products may include: **Digoxin, Conjugated Estrogen (Premarin), Chlorpromazine (solid oral dosage forms), Theophylline (controlled release dosage forms) and Levothyroxine.**

Brand drugs listed under the “Generic Drugs” column should be considered as non-preferred brands as there is a generic equivalent readily available. However, brand drugs listed under the “Generic Drugs” column that have a caret (^) are preferred brand drugs with preferred copays although the generic equivalents will have a lower copay.

Non-Listed Drugs & Drug Categories

Drugs not specifically listed in the book should be deemed either as “non-preferred” or “non-formulary” and may require additional member contribution or “copay”. Drug categories that are not specifically listed in the book are generally categories of lower utilization comprised of categories where generic products are readily available (i.e. cough & cold) and shall be driven by plan design if covered.

Prior Authorization Process

Some drug products may require approval called “prior authorization” when the member presents a prescription for that drug product. In other cases, another drug may be required to be used first (called a “step edit”) before the drug prescribed may be covered. Note that the required drug will be indicated with an ^{SE}. The following general criteria are used before a Prior Authorization will be issued:

1. The patient has failed an appropriate trial of other clinically Preferred Branded Drugs (possibly one requiring a step edit)
2. The use of a Preferred Branded Drug may provoke an underlying condition, which would be detrimental to patient care.
3. Injectable, chemotherapy, supplies for infusion, and nutritional supplements **may** require a special request be filled out and faxed to the plan sponsor for authorization. Please indicate if the supplies need to be sent to the physician office or the member.

Specialty Pharmacy Products

The P&T Committee, using current medical literature, has developed a “specialty” pharmacy product formulary comprised of higher cost medications. While not all “specialty” products within the assigned class are therapeutically bio-equivalent, the classifications were determined to group together higher cost agents used for similar treatments.

Formulary Modifications & Comments

The following changes have been made to this Clinically Preferred Drug List since last quarter. New drugs approved by the FDA that have been added to the Clinically Preferred Drug List as Non-Preferred Brands may not appear below.

Drug Name	Preferred Agent	Page	Tier	Indications or <Comments>
VFend	Generic now available	10	3	Anifungal
Atacand & Atacand HCT	Generics, Diovan/HCT & Benicar/HCT	15	3	Treatment of Hypertension
Diovan, Diovan HCT, Exforge	Moved to Preferred Tier	15	2	Treatment of Hypertension
Tekturna, Tekturna HCT, Valturna	Moved to Preferred Tier	16	2	Treatment of Hypertension
Avodart	Generics, Now Preferred	16	2	Treatment of BPH
Uloric	Moved to Preferred Tier	19	2	Treatment of Gout
Roxanol	Generic Inavailability	21	2	Treatment of Pain
Vimovo	New Agent	22	2	Treatment of Pain
Amitiza	Moved to Preferred Tier	25	2	Treatment of IBS
Gianvi	Generics & Yaz	26	3	Oral Contraceptive
ActoPlusMet XR	New Agent	29	2	Treatment of Diabetes
Zymaxid	New Agent	36	2	Ophthalmic Antibiotic
Zirgan	New Agent	36	2	Ophthalmic Antiviral

Drugs that are NOT listed in this book where the competitors *are* included should be considered excluded or not covered.

Antibiotics

GENERIC DRUGS	PREFERRED BRANDS	NON- PREFERRED BRANDS
Penicillins & Cephalosporins Amoxicillin / Amoxil Amoxicillin Potassium Clavulanate / Augmentin/ES/XR Ampicillin / Omnipen, Polycillin Cefaclor / Ceclor, Ceclor CD Cefadroxil / Duricef, Ultracef Cefdinir / Omnicef Cefuroxime Axetil / Ceftin, Ceftin Suspension Cephalexin / Keflex, Biocef, Zartan Cephradine / Velosef Cefpodoxime Proxetil / Vantin Cefprozil / Cefzil Dicloxacillin / Dynapen Penicillin VK / Veetids, V-Cillin K		Cedax (Ceftibuten) Spectracef (Cefditoren Pivoxil) Suprax (Cefixime) Vancocin (Vancomycin) Vibativ Infusion (Telavancin) W1A / W1W / W1X / W1Y
Tetracyclines Doxycycline / Vibramycin, Monodox, Vibra-Tabs Minocycline / Minocin, Dynacin, Solodyn Tetracycline / Sumycin	Adoxa Pak' (Doxycycline Monohydrate)	Doryx (Doxycycline Hyclate) Oracea (Doxycycline Monohydrate) W1C
Macrolides, Clindamycins & Ketolides Azithromycin / Zithromax Clarithromycin / Biaxin XL Clindamycin / Cleocin Erythro-Base / Ery-Tab, E-mycin Erythro-Estolate / Ilosone Erythro-Ethylsuccinate / E.E.S., Eryped Erythro-Stearate / Erythrocin Erythro & Sulfa / Pediazole Clarithromycin / Biaxin		Ketek (Telithromycin) Z-Max (Azithromycin) W1D / W1K / W9A
Sulfonamides, Sulfones & Nitrofurantoin Nitrofurantoin / Macrochantin Sulfa-Trimethoprim / Septra, Bactrim/DS Sulfasalazine / Azulfidine		Furadantin Liquid (Nitrofurantoin) Gantrisin Ped (Sulfisoxazole) Macrochantin (Nitrofurantoin Macro) W2A / W2F
Miscellaneous Antibiotics	Xifaxan (Rifamixin)	Zyvox (Linezolid) W10 / W9C

Antibiotics (Continued)

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
Quinolones Ciprofloxacin / Cipro , Cipro XR Ofloxacin / Floxin	Avelox¹ (Moxifloxacin)	Factive (Gemifloxacin) Levaquin (Levofloxacin) Noroxin (Norfloxacin) W1Q
Antivirals Acyclovir / Zovirax Amantadine / Symmetrel Famciclovir / Famvir Ganciclovir / Cytovene Rimantadine / Flumadine	Relenza (Zanamivir) Tamiflu (Oseltamivir) Valtrex (Valacyclovir) Virazole (Ribavirin)	Synagis (Palivizumab) Valacyclovir [SSG] (Valtrex) W5A / W5D / W5F

Anti-Infectives

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
HIV Antiviral Agents Didanosine Megestrol Acetate Suspension / Megace[*] Zidovudine / Retrovir	Agenerase (Amprenavir) Atripla (Efavirenz/Emtricitab/Tenofovir) Crixivan (Indinavir) Epivir (Lamivudine) Epzicom (Abacavir/Lamivudine) Intelence (Etravirine) Isentress (Raltegravir) Kaletra (Ritonavir/Lopinavir) Norvir (Ritonavir) Reyataz (Atazanavir) Selzentry (Maraviroc) Trizivir (Abacavir/Lamivudine/Zidovudine) Videx (Ped. Soln/Chewable) (Didanosine) Viramune (Nevirapine) Zerit (Stavudine)	Megace ES Suspension (Megestrol)* W5C / W5K / W5I – W5P / C7F

* *Megace* & **Megace ES** only recommended for appetite enhancement due to significant weight loss in patients with anorexia, cachexia or AIDS

Antiemetic, Anti-Parkinsons & Anti-Migraine Agents

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
<p>Antiemetics</p> <p>Dronabinol / Marinol Granisetron / Kytril Meclizine / Antivert, Vertin Ondansetron / Zofran, Zofran ODT Prochlorperazine / Compazine Promethazine HCL / Phenergan Trimethobenzamide / Tigan</p>	<p>Anzemet' (Dolasetron) Emend' (Aprepitant) Transderm-Scop Patch (Scopalamine)</p>	<p>Cesamet (Nabilone) Sancuso Patch (Granisetron) Zuplenz Film (Ondansetron) ^{REVIEW}</p> <p style="text-align: right;">H6J</p>
<p>Anti-Parkinsons Agents</p> <p>Amantadine / Symmetrel Benzotropine / Cogentin Bromocriptine / Parlodel Carbidopa/Levodopa / Sinemet/CR, Parcopa Pergolide / Permax Pramipexole / Mirapex Ropinirole / Requip Selegiline / Eldepryl, Carbex Trihexyphenidyl / Artane Sequels</p>	<p>Azilect' (Rasagiline) Comtan (Entacapone) Mirapex ER' (Pramipexole) Requip XL' (Ropinirole) Stalevo (Carbidopa/Levodopa/Entacapone)</p>	<p>Akineton (Biperiden) Apokyn (Apomorphine) Kemadrin (Procyclidine) Tasmar (Tolcapone) Zelapar (Selegiline)</p> <p style="text-align: right;">H6A / H6B</p>
<p>Anti-Migraine Agents</p> <p><u>Triptans:</u> Sumatriptan Tablets / Imitrex</p> <p><u>Ergotamines/Other:</u> Aspirin or Butalbital/Caff / Fiorinal APAP/Butalbital/Caff / Fioricet Ergotamine/Caffeine / Cafergot Isometheptene / APAP Combo / Midrin, Migralam Dihydroergotamine/ DHE 45</p>	<p><u>Triptans:</u> Maxalt/MLT' (Rizatriptan) Relpax' (Eletriptan*) Treximet' (Sumatriptan/Naproxen Sodium)</p> <p><u>Ergotamines/Other:</u></p>	<p><u>Triptans:</u> Alsuma Inject (Sumatriptan) ^{REVIEW} Amerge (Naratriptan) Axert (Almotriptan) Frova' (Frovatriptan*) Imitrex Spray & Inject (Sumatriptan) Sumavel DosePro Inject (Sumatriptan) Zomig/ZMT (Zomitriptan)</p> <p><u>Ergotamines/Other:</u> Cambia Powder (Diclofenac Potassium) Ergomar (Ergotamine) Migral (Isometheptene) Migranal Nasal (Dihydroergotamine)</p> <p style="text-align: right;">H3F</p>

Neurologic Agents

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
<p>Alzheimer's Agents</p> <p><u>AchE Inhibitors</u> Galantamine / Razadyne/ER Pyridostigmine / Mestinon</p>	<p><u>AchE Inhibitors</u> Aricept/ODT' (Donepezil)</p> <p><u>NMDA Receptor Antagonists</u> Namenda' (Memantine)</p>	<p><u>AchE Inhibitors</u> Exelon Tablets'/Patches' (Rivastigmine) Prostigmin (Neostigmin)</p> <p><u>NMDA Receptor Antagonists</u></p> <p style="text-align: right;">J1B H1A</p>
<p>Anticonvulsants</p> <p>Carbamazepine / Tegretol Clonazepam / Klonopin Divalproex Sodium – Depakote/ER Ethosuximide / Zarontin Gabapentin / Neurontin, Gabarone Lamotrigine / Lamictal Levetiracetam / Keppra Mephobarbital / Mebaral Oxcarbazepine / Trileptal Phenobarbital / Phenobarbital Phenytoin / Dilantin Primidone / Mysoline Topiramate / Topamax Valproic Acid / Depakene Zonisamide / Zonegran</p>	<p>Dilantin 30mg/50mg ONLY (Phenytoin) Lamictal XR/ODT' (Lamotrigine) Lyrica' (Pregabalin) Neurontin Suspension Only (Gabapentin) Tegretol XR only (Carbamazepine)</p>	<p>Carbatrol (Carbamazepine) Celontin (Methsuximide) Diastat (Diazepam) Equetro (Carbamazepine) Felbatol (Felbamate) Gabitril (Tiagabine) Keppra XR (Levetiracetam) Phenytek (Phenytoin Sodium') Sabril (Vigabatrin) Stavzor (Valproic Acid)</p> <p style="text-align: right;">H4B</p>
<p>Fibromyalgia Agents</p>	<p>Lyrica' (Pregabalin) Savella' (Milnacipran)</p>	<p>Cymbalta (Duloxetine)</p> <p style="text-align: right;">H0G</p>

Blood Modifiers

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
<p>Anticoagulants / Heparin-Related Products</p> <p>Warfarin Sodium / Coumadin Heparin Sodium</p>		<p>Arixtra (Fondaparinux) Fragmin (Dalteparin) Innohep (Tinzaparin) Lovenox (Enoxaparin)</p> <p style="text-align: right;">M9K / M9L</p>
<p>Platelet Aggregation Inhibitors</p> <p>Anagralide / Agrylin Cilostazol / Pletal Dipyridamole / Persantine Pentoxifylline / Trental Ticlopidine / Ticlid</p>	<p>Aggrenox[®] (Dipyridamole / Aspirin) Plavix (Clopidogrel)</p>	<p>Effient (Prasugrel)</p> <p style="text-align: right;">M9P / M9S / N1D</p>
<p>Hematopoietic Agents</p> <p><u>Hematinics</u></p> <p><u>Iron Replacements (Orals)</u> Ferrous Sulfate, Ferrous Gluconate, Folic Acid Ferrous Fumarate / Chromagen, Ferrogen Conison, Niferex</p>	<p><u>Hematinics</u></p> <p><u>Iron Replacements (Orals)</u> Repliva[®] (Iron supplement)</p>	<p><u>Hematinics</u></p> <p>Aranesp (Darbepoetin) Epogen (Epoetin) Procrit (Epoetin)</p> <p style="text-align: right;">N1B</p> <p><u>Iron Replacements (Orals)</u></p> <p>Albafort (B12 Complex) Chromagen FA (Ferrous Fum/Complex) Hematogen (Ferrous Fum/Complex) Hematron (Ferric Am/Complex) Niferex Forte/150/PN (Multi-Vitamin) Irofol (Iron/Folic Acid) Siderol (Iron/Vitamin Complex)</p> <p style="text-align: right;">C3B</p>

Cardiovascular (Heart) Agents

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
<p>Alpha & Beta Blockers</p> <p><u>Alpha Blockers</u> Doxazosin / Cardura Prazosin / Minipress Terazosin / Hytrin</p> <p><u>Beta Blockers</u> Acebutolol / Sectral Atenolol / Tenormin Betaxolol / Kerlone Bisoprolol / Zebeta Metoprolol / Lopressor, Toprol/XL Nadolol / Corgard Pindolol / Visken Propranolol / Inderal/SR/LA Sotalol / Betapace/AF Timolol / Blocadren</p> <p><u>Alpha-Beta Blocker</u> Carvedilol / Coreg Labetolol / Normodyne, Trandate</p>	<p><u>Alpha Blockers</u></p> <p><u>Beta Blockers</u> Bystolic' (Nebivolol)</p> <p><u>Alpha-Beta Blocker</u> Coreg CR' (Carvedilol)</p>	<p><u>Alpha Blockers</u> Dibenzyline (Phenoxybenzamine)</p> <p><u>Beta Blockers</u> Innopran XL (Propranolol) Levatol (Penbutolol)</p> <p><u>Alpha-Beta Blocker</u></p> <p style="text-align: right;">J7A - J7C</p>
